

## **ABOUT RUST BULLET, LLC**

Rust Bullet, LLC is the Manufacturer of Rust Bullet® Products, a Superior Technology developed specifically to address the issues of corrosion affecting nearly every industry worldwide. Although Rust Bullet's Corporate Headquarters are located in Reno, Nevada, USA, and all Rust Bullet Products are manufactured in the United States of America, Rust Bullet has an International Distribution Network, with the capability of providing Rust Bullet Products worldwide, and a 24 hour Customer Service Department to provide technical assistance to our customers. Over the past decade, Rust Bullet, LLC has continued to develop their product line to answer the specific needs of their public, private, commercial and industrial customers.

## **ABOUT RUST BULLET® PRODUCTS**

Rust Bullet has developed a simple, easy to apply, rust/corrosion control product that has been scientifically tested by independent certified laboratories under the internationally accepted methods, and proven to be more effective than any other product available on the market today. Rust Bullet has not just been proven to be the best product available for rust and corrosion control, the laboratory tests include additional performance evaluations which reveal Rust Bullet Products also contain a wide range of protective abilities that continue to impress the world. Rust Bullet is a one-step product that coats over rusted or clean substrates to provide the ultimate corrosion control and protection with minimal surface preparation. Rust Bullet has been awarded two patents from the United States Patent Office. This is the first time the United States Patent & Trademark Office (USPTO) has issued two patents for two new technologies to one rust/corrosion-control product. For in-depth information on these scientific comparative tests, as well as the additional performance tests to which Rust Bullet has been subjected, please visit our website at [www.RustBullet.com](http://www.RustBullet.com).

**If it's made of iron or steel, it will rust and corrode if left unprotected.  
Rust Bullet®, It Kills Rust!**
